DIGITALLY PRINTED ALUMINUM SIDING

**High-definition laser-printed façades.
130 specialty colors and wood grain
patterns.**

DIZAL Faux Wood Aluminum Siding

DIZAL Faux Wood Grain Aluminum Siding is created when real wood planks are digitized to reproduce nature's varieties of wood.

- Over 130 standard color patterns and grains. Exclusive HD printing process at 660 dpi prints images onto extruded aluminum.
- Noncombustible Class A faux wood panels per NFPA 285.
- Excellent alternative to real wood on walls and soffits.
- 25-year color warranty by ASTM D2414, AAMA 2605 and AA-DAF-45-R03.
- Maintenance free.
