

Expand Modular *Large Format Steel Panel System*

One-third less labor than ACM composite systems.

Modern Steel large format panels are a 24-gauge segmented rainscreen application with interlocking seams and hidden fasteners. This truly uncomplicated system eliminates pre-measurements and fabrication delays for less than \$15/sf.

BOB CUJÉ | 800-343-6660 | BOB@MODERN-MATERIALS.COM

Large Format Expand Modular Steel Panels can be cut and modified on-site to create the perfect fit without the need for pre-measurements or shop fabrication. One-inch horizontal reveals are integrated into the hidden fastener design while vertical reveals are achieved with a transition trim. Once the panels have been folded, rigid foam is securely bonded to the back giving the panel the strength and support allowing for large flat and smooth panel faces.

Specifications

Wall Coverage: 20-1/2"

Fasteners: Hidden

Installed with Reveal on all Four Sides

Panel Size: 20-1/2" x 60"

Available in 24 Gauge Standard & Specialty Colours

Installed on a floating clip system, ideal for thermal expansion and contraction

Foam Reinforced Panel

Recommended to Install on Minimum Solid Substrate of 1/2" Plywood, Building Wrap/Membrane, & Drainage Mat.
