FORMA STEEL

CLADDING SYSTEMS

FormedSteel cladding is a modern steel panel solution crafted from 24 gauge steel. FormedSteel Plank is stronger than most other siding options. Our 40-year paint finish warranty features coatings formulated with a super durable modified polyester resin. This results in superior resistance to fading and environmental weathering.

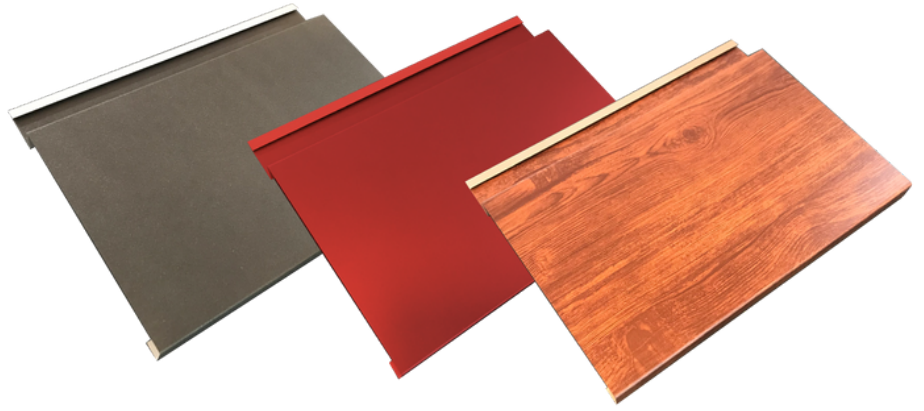

5 Layers of Protection are built into every sheet of steel we manufacture. This includes an ASTM A792 Or A653 Structural 80,000 Psi Minimum Yield High Tensile Steel Substrate. Our steel is also rated with Class 4 Impact Resistance.

24 ga steel is produced in North America and provides a very competitive and structurally superior commercial grade wall panel.
