

LARGE PANEL MODULAR SIDING

Large-Scale, Adaptable & Modern Panel System

Manufactured with a coverage of 20-1/2" x 60" and with a variety of uses from accents, fascia, or full walls, this system is truly adaptable. This panel is installed on a floating clip system, ideal for thermal expansion and contraction. Between the hidden fastener system and utilization of our existing trim catalogue, **Expand Modular** offers you an uncomplicated installation compared to much more elaborate systems on the market.

The 1" horizontal reveals are integrated into the hidden fastener design while vertical reveals are achieved with a transition trim. Panels can be cut and modified on site to create the perfect fit without the need for additional sub structures, perfect for both new construction or as part of a renovation/retrofit. The 24 gauge material allows for the maximum variety in our standard colours & specialty finishes.

Application: Wall

Coverage: 20-1/2" x 60" | **Depth:** 7/8"

Available Gauge: 24

Available in **40+ Standard Colours & Specialty Finishes**

Installed with reveal on all four sides

Required: 6" flat backer strips between panels

Substrate: 1/2" standard plywood minimum

Recommended: Install over membrane and drainage mat

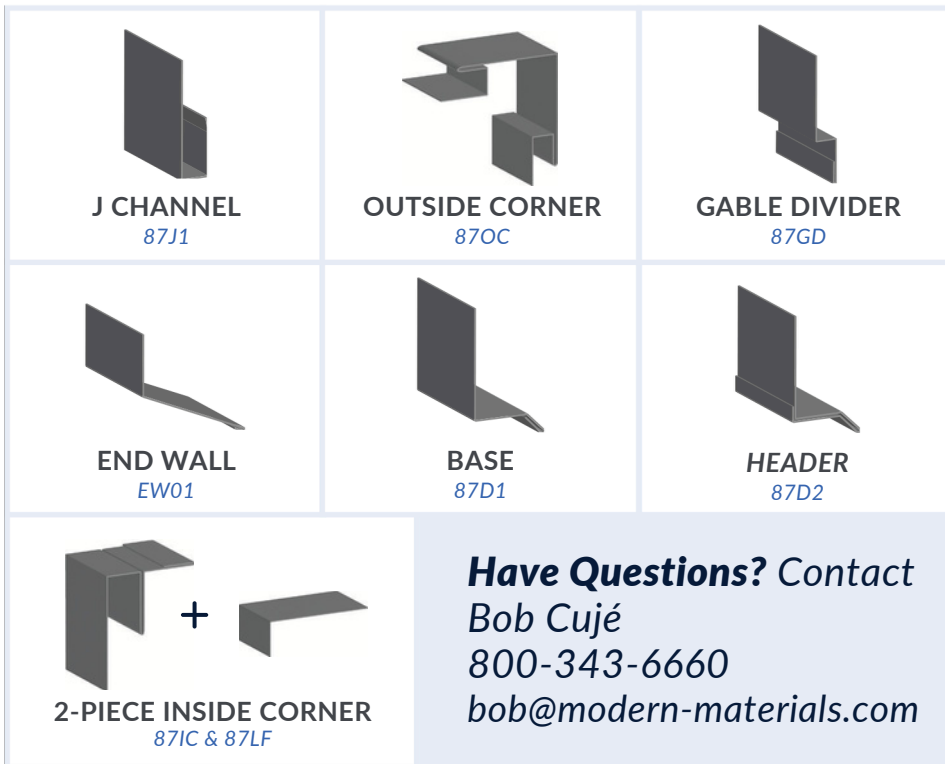

Foam Reinforced Panel

Once the panels have been folded, rigid foam is securely bonded to the back giving the panel strength and support allowing for large flat and smooth panel faces.

Recommended Trims

Our trim codes will depend on your rib height/coverage of choice. Included on this sheet are the most commonly selected trims for this panel but *custom trims are available*. When selecting your trim, please ensure you indicate your gauge & colour of choice.
